

WORLD NAVTEX QSL ADDRESS LIST

Version 3.3

Last updated 1st of December 2010

Compiled by Alan Gale, G4TMV

This Database is divided into two separate sections.

Section One:
Section Two:

Known and speculated addresses
Credits and Sources

NOTE #1: The Country Identifiers used in this list are taken from the NDB List Country Code List (available from the NDB List Info page: <http://www.ndblist.info/info/countrylist.pdf>)

NOTE #2: Many of the addresses shown can't yet be confirmed as being 100% accurate and up to date. Any updates and corrections would be much appreciated, your help is needed to achieve this!

NOTE 3# This new database is still very much under development, and I would greatly welcome any additions or corrections to this list. Many NAVTEX Stations may be remotely operated, and reports will often be sent via a central address, these are given where known, along with e-mail addresses for e-reports. Names or verification signers, or addresses that are known to have worked are included, but many have not been confirmed yet so details can't all be guaranteed to be 100% accurate. Many of the addresses are thought to be useful starting places, but may not work, or at best will just get your reports forwarded on to the correct department, in such cases I would greatly appreciate any correct details that may have worked for you, and in particular, e-mail addresses, as many Dxers now like to try this quicker (and cheaper) route for their reception reports.

Note 4 # To keep e-mail addresses away from the Spambots I have placed a 'space' at either side of the @ symbol, these will need to be removed before using!

Note 5 # Where known names of Verification Signers that have worked are shown

Note 6 # NAVTEX enthusiasts may be interested in the new NAVTEX DX Group, which Can be found at: <http://groups.yahoo.com/group/navtexdx/>

Updates/corrections for this address list can be sent to: [navtexupdates at ndblist.info](mailto:navtexupdates@ndblist.info)
